

Upskilling HVAC technicians on heat pump technologies for green energy transition

PUMP-UP hosts the 4th Consortium Meeting in Athens

On 25–26 September, the PUMP UP consortium met in Athens for its 4th project meeting, sharing progress and aligning next steps to accelerate heat pump deployment across Europe. The discussions were productive and inspiring, confirming that the project is well on track and supported by strong collaboration across all partners.

Key Discussions

- Development of the certification scheme and the examination procedure of the online course
- Internal testing, fine-tuning and launch of the online course
- Structure of the mobile application
- Planning of the training seminars

Massive Open Online Course Launch

We are pleased to announce the launch of our free Massive Open Online Course (MOOC) designed to upskill HVAC technicians, sector professionals, and trainers in heat pump technologies. This course supports the growing need for skilled professionals in the green and sustainable energy transition.

What the Course Offers

- 7 structured modules
- Practical exercises, MCQs, and Q&A opportunities
- Downloadable materials and presentations
- On-demand content, accessible from any device
- No prerequisites, open to all learners

Who Should Enroll?

- HVAC and heat pump professionals
- Job seekers looking to enter the heat pump or HVAC sector
- Adult educators and trainers in technical or vocational fields

Registration is now open, secure your place and start learning:

WHAT IS NEXT?

PUMP UP Mobile App

The PUMP-UP virtual assistant app is currently in development and will be released in the coming months. It will provide HVAC technicians with key guidance, safety notes, and practical checklists based on the PUMP-UP training modules.

The app will be available in seven languages and accessible on both Android and iOS devices.
